CS 112 Lab 9

Function Calls

Functions

Functions contain blocks of code
    Typically contain code that is going to be called multiple times by other functions

Call a function by its name providing appropriate arguments
    FunctionName(…)

Lab 9

Make sure to download the starting template as it contains provided code

Two tasks to complete

Think carefully about how you can use the return values of other functions

16 test cases – each test is worth about .4 points
